SUMMARY

Third-year Computer Science and Engineering student at Nagaland University with strong interest in Artificial Intelligence, Machine Learning, Cybersecurity, and Full Stack Development. Experienced in developing practical projects using Python and web technologies, including machine learning applications and secure web systems. Passionate about building real-world solutions, continuously learning modern technologies, and applying problem-solving skills to develop intelligent and scalable software systems.

EDUCATION

Nagaland University

B.Tech - Computer Science and Engineering - CGPA: 8.21

2023 – Expected 2027

Kohima, Nagaland

Kendriya Vidyalaya

Higher Secondary Examination (Class XII) - CBSE - 66.6%

March 2023

Ankleshwar, Gujarat

Kendriya Vidyalaya

Secondary Examination (Class X) - CBSE - 87.4%

March 2021

Ankleshwar, Gujarat

PROJECTS

Face Recognition Attendance System | Python, OpenCV, Machine Learning

- Developed an AI-based system that detects and recognizes faces to automatically record attendance.
- Implemented facial recognition using Python and OpenCV with machine learning techniques in Google Colab.

Student Performance Prediction System | Python, Pandas, Scikit-learn

- Built a machine learning model to predict student academic performance based on historical academic data.
- Performed data preprocessing, model training, and evaluation using Python libraries.

Fake News Detection System | Python, Machine Learning

- Developed a machine learning model that classifies news articles as real or fake using text analysis techniques.
- Applied feature extraction and classification algorithms to improve prediction accuracy.

Full Stack User Authentication System | HTML, CSS, JavaScript, PHP, MySQL

- Developed a secure web application that allows users to register and login with authentication.
- Implemented backend database integration and session management using PHP and MySQL.

TECHNICAL SKILLS

Programming Languages: HTML, CSS, JavaScript, PHP, Python, C, C++

Databases: MySQL, SQL

Cybersecurity Tools: Kali Linux, Kioptrix, VirtualBox

Concepts: Vulnerability Analysis, Penetration Testing Fundamentals

Tools: GitHub, Google Colab, VS Code

CERTIFICATIONS

- Geodata Processing using Python and Machine Learning – ISRO
- Python for AI and Machine Learning – NPTEL

WORKSHOP AND TRAINING

- Cybersecurity Bootcamp – NIELIT Kohima (2025)
- Web Development Workshop – Nagaland University (2025)

EXTRACURRICULAR

- Participated in coding and debugging competitions.
- Active member of technical activities in college.
- Represented institution in Judo and Yoga activities.
